

Interesting Sites for Science

MECHANICS

Science (and more) to Music

This site offers many songs related to math, social studies, and science concepts. Science concepts include water & pollution, scientific inquiry, changes in matter, and much more. Math concepts range from order of operations to quadratic and exponential functions. After choosing a topic, you can listen to the song online, download the mp3, view lyrics, and possibly view an accompanying video.

Quarked! - The Quarked!

The Quarked! project was conceived by Professor Alice Bean and a diverse team of collaborators at the University of Kansas in 2003 as an entertaining method of introducing the world of subatomic physics to kids and adults. They imagined a world in which every child knew about the small and abstract parts of science as well as they knew their favorite TV characters and asked "If we could spark such an interest in basic science early on, would the level of science literacy grow as the audience aged?" And "If children were exposed to the ideas of subatomic physics early, would more of them understand and even pursue the scientific challenges of the next century?"

The story behind the science

Thirty stories spanning five disciplines help students explore the development of key science concepts through the eyes of the scientists who were involved. Supplemental resources are provided for teachers to help achieve the greatest impact from the stories.
